Precision Partners Prepares for Glass Problems Conference 2023: Navigating Industry Challenges and Innovation

We are pleased to be attending the upcoming 84th Glass Problems Conference 2023. This annual event serves as a platform for professionals in the glass industry to gather and discuss the latest advancements in glass manufacturing. Key members of our team, including Nick Evans, John Wilson, and Cameron Kiani, are excited to engage with peers, exchange perspectives, and contribute to the industry's progress.

The Glass Problems Conference, scheduled for November 6th to 9th, is a significant event for the global glass industry. It brings together manufacturers, suppliers, and experts to foster innovation and knowledge sharing.

During the conference, Cameron Kiani will deliver a presentation on the evolution and advancements in "Catalytic Ceramic Filter Systems – 12 Years After the First Installation."

The Glass Problems Conference 2023 aims to facilitate knowledge exchange and networking opportunities. Stay tuned for valuable insights and developments from the conference.
